**researching leading edge  
practices to eia follow-up and  
monitoring.**

---

**background**

---

**01**

**develop guidance for the implementation of leading edge practices for follow-up and monitoring using expert interviews and a document review.**

---

**methods**

---

**02**

**continuous learning**

**public and indigenous  
participation**

**clear roles and responsibilities**

**adaptive management**

**independent oversight**

**traditional knowledge**

---

**practices**

---

**03**

## guidance #1

the development, **design and implementation** of follow-up and monitoring programs should involve participation from the public and indigenous communities.

---

**monitoring design**

---

**04**

## guidance #2

monitoring programs should be supported by **community-based monitoring** initiatives at a project scale or regional scale where feasible.

---

**community**

---

**05**

## guidance #3

public and indigenous  
**engagement** should continue on  
after project approval and into  
the follow-up and monitoring  
stage of a project.

---

**engagement**

---

**06**

## guidance #4

monitoring **advisory committees** and working groups should be open to all interested stakeholders and have full access to all monitoring results.
